# Charlotta Lindberg

Frontend student with .NET experience

From leisure leader to frontend developer, now I have found what I want to do all day. Organizing activities and teaching the children new things has been great fun and rewarding, but there was something about programming that captured me in a completely different way. It just felt right to follow that curiosity and see where it could take me.

And here I am now, completely engrossed in creating and improving web pages. It's that kick of solving problems and building something from scratch that makes me know I made the right choice.

## Education

### 2023 - Ongoing

Frontend developer

### Nackademin, Stockholm

#### Courses

- HTML, CSS and accessibility
- Javascript 1 - 4
- Javascript as backend
- Graphic tools
- Interaction with CMS
- Frontend projects and Agile methods

### School project

[wheelsoftimecreatures.netlify.app](#)

[quizforankademin.netlify.app](#)

[rentaplant.netlify.app](#)

### 2021 - 2023 Graduate

.NET developer

### IT - Högskolan, Stockholm

#### Courses

- Programming with C#
- Database development and administration
- Web development with C#
- Agile workflow
- Customer understanding, consulting and reporting
- Clean Code and refactoring

### Thesis:

The thesis report describes my work on improving and refactoring the codebase of an administrative section of a client's website. The goal was to create a more maintainable, scalable, and reusable codebase. By applying principles and techniques of design patterns and modern development processes, I have achieved higher code quality and an enhanced user experience.

### Internship

**Just Value** aug 2022 - nov 2022

Delivers services in SEO, websites and digital marketing. I learned Wordpress and search engine optimization.

**Signifikant** jan 2023- apr 2023 & summer 2023

Effective management of aftermarket information. I "cleaned up" their user interface and frontend code on the clients' administrative site. The biggest lesson I have taken with me is to find in a large codebase and feel safe working with CSS.
